"We would really appreciate if you can share a picture with us on our Facebook page and let us know feedback about our product!"

Thank-you for purchasing our ID Tags, here's a quick Instruction Guide on how to attach them:-

To attach your ID Tags, simply use a standard set of pliers in a **Horizontal** Position and apply pressure until you it engages into the locked position. *Alternatively if you do not have a set of pliers you can use a hammer and firmly tap from the top marked surface of the tag, do not tap from the bottom.*

Do **Not** attach with pliers in a vertical position.

Correct Attachment Achieved. *Please note for all Dog or ID Tags used in high performance areas. We recommend that they **Must** be locked into position with the locking connection point facing away, to ensure no snagging or losses occur.
